

OUR ENVIRONMENTAL POLICY;

TEZCAN UN, has set out with the idea of the necessity of evaluating environmental sensitivities as a primary priority when determining working methods. In the light of this consciousness, it has determined the development of every process in our manufacturers in an environmentally sustainable, environmentally sensitive and curative direction as a goal and principle.

Our organization; By producing planning and implementation strategies in accordance with the principles stated below, commits to continuously improve our potential and performance in every field for an environmentally sensitive, sustainable environment.

The standards specified in all relevant legal regulations are taken into application.

In order to reduce the use of natural resources, it is aimed to consume reusable and recyclable materials as much as possible.

Within the scope of wheat flour production activities, the wastes arising from our activities are minimized in every situation and in every field where it can be applied.

When making investment decisions, environmental criteria are taken into account.

We apply and follow the ISO 14001:2015 Environmental Management System that we are maintaining in all our processes.

By taking a risk-based approach within the framework of our environmental dimensions, we determine our process risks and take measures related to these risks.

In order to be successful in contributing to the environment, we provide information transfer to our customers, employees, suppliers and local governments about the problems that may arise related to the environment of our factory, our goals, achievements and environmental protection strategies.

We contribute to the studies related to the development of our environmental activities by taking into account the concerns and suggestions of our neighbours, customers and employees about the environment. For this purpose, projects are created and attempts are made to provide support.

We are aware of the importance of the environment for our future and ensure that the impact of our company's activities on the environment is kept as low as possible by implementing an eco-efficient environmental policy. Environmental pollution is prevented thanks to the logical use of natural resources and energy.

It plans and performs all its activities within the framework of the principle of continuous protection of the environment, non-pollution, minimal use of resources, and aims to continue these activities by constantly improving.

We fully provide all the legal conditions related to the protection of the environment and other conditions that it undertakes to comply with, and we aim to be one of the exemplary organizations in the sector that add value to the environment by working on these conditions.

It is ensured that all personnel are trained in relation to the protection of the environment.

OUR ENVIRONMENTAL COMMITMENT;

As the Senior Management of TEZCAN;

At all levels of our organization, with all our employees and stakeholders, the effectiveness of our constantly evolving environmental management system will be monitored and reported at an accountable level, and the principle of a risk-based environmental approach will be followed,

To ensure that the environmental scope and strategy and environmental policy and objectives are aligned,

The integration of management systems in our processes will be ensured,

That the necessary organization, resource and training needs will be provided in order to achieve the Goals and

Objectives of the Environmental Management System,

We are committed that the importance of all activities will be announced to our employees.
